St. Louis, called the Repudiator. Listen to its advice:

"But while Mr. Pendleton and General Singleton have taken a step in the right direction, they both stop short of the real merits and justice of the case. Why would they pay the so-called debt in greenbacks, which are below par? We have already said, because they feel an inward consciousness that it would be unjust to the people to require them to pay it par, in gold. But why unjust? Because the so-called debt is a fraud. But, if it be a fraud, why pay it all? It is clear that all those who propose to pay this so-called debt in depreciated greenbacks base their proposition upon the inward conclous ess that it represents a grieving wrong, and that it has no just claim to recognition. This fact being conceded, should we not show ourselves base cowa is and truckling sycophants to pay it as?"

far surpass those produced by the waters of that famous spring.

Lawyers, doctors, statesmen, whose heads were baid, have said it was constitutional, or rather hereditary. Let us say a word as to hereditary baidness without entering into an extended argument. The brain is the machine that runs the human system, and where will-power—as the plurenologists call it—or firances, together with a large amount of brain, are both largely developest, this character does not let the world move him he moves the world. If a merchant, his feet are planted on the five continents of the globe; if his business is to map down the orbs of upper worlds, he finds new and undiscovered worlds for investigation; or, as the poet, drags all the horrors or sublimities of the magnation in rhyme before your vision. Such mem may never have a day's sickness from the cradle to the fomb, still there is always a slumbering fire, kept alive by the action of the brain, and unless the person uses. far surpass those produced by the waters of that fa-

to keep the hair healthy he is certain to become bald. If you wish to see bald heads look at the successful lawyer, doctor, statesman, merchant, banker, etc. He has given every moment of his time and thoughts to his profession, and not once thought of his hair. On the other hand, if the man's development does not prompt him to be first in the world's drama, but rather remain at the tall-sud of every thing, such men are never bald, without brain fever or some offer prostrating sickness brings the hair out. The two charactirs described can be found in almost every family—the children of one futher. Its baldness then hereditary? Chemists have prepared articles for the hair until there was no safe for it and then like the chamelion change its color and name and nothing else.

Prof. Christy's Object was to create something which should last forever. The first success attained was in ascertaining the cause of gray hair and buildness. The second, the discovery of a vegetable compound, whose nutrient viriues would allay the fever of the overtasked brain, and thousands can testify that the

Lotio

is just the thing. If the head is covered with dand ruff, something is wrong with the roots of the hair if the hair is tavaling gray it needs doctoring.

Christy's Hair Lotio will restore that which has turned gray to its origi-nal color. After which, if the Lotlo is only applied once a week, the hair will remain healthy, and re-tain its natural color until death. If your harr is harsh, dry, and falling out, this is the fine to pre-vent baldness, step your hair from falling out.

Prof. Christy's Hair Lotio will actually do it.

Ask any one who has used it for satisfactory in formation.

If you are baid use the HARR LOTTO, we can refer to many who, a short time ago, were baid, as
the present it is impossible to find a baid spot on
heir heads.
